

**Guidelines for series approval of products for
Electronic Musical System
with input power below 200 Watts**

Basic Configuration	Grouping as one series provided product has
Mains operated with internal power supply	<ul style="list-style-type: none">• Same Mains PCB layout or same SMPS board layout.• Same enclosure except for differences of decoration parts.• Power Transformer: Same design and insulation system, if applicable• Same Class of construction• Same rating of battery, if applicable• Same IP rating• Registered adaptor of same rating, if applicable.• The change in location of buttons may be accepted subject to the lab ensures that it does not have effect the safety.

Guidelines for Quantitative Selection of Samples

- A series may consist of 10 models.
- Unless specified otherwise, one sample may be tested for each series.
- In any of the above consideration, worst case configuration from Safety Design perspective must be selected for testing.
