

Guidelines for series approval of products for Television other than Plasma / LCD / LED TVs

Basic Configuration	Grouping as one series provided product has
Television with in-built adapter	<ul style="list-style-type: none"> • The change in location of buttons may be accepted subject to the lab ensures that it does not have effect the safety • Same Input voltage rating and current • Same Mains layout or same SMPS board layout. • Same enclosure except for differences of decoration parts. • Power Transformer: Same design and insulation system • Same IP rating
With external adapter	<ul style="list-style-type: none"> • The change in location of buttons may be accepted subject to the lab ensures that it does not have effect the safety • Registered adapter of same rated input voltage and output current. • Same enclosure except for decorative parts. • Same IP rating
CRT	<ul style="list-style-type: none"> • The change in location of buttons may be accepted subject to the lab ensures that it does not have effect the safety • Same Input voltage rating and current • Same Mains layout or same SMPS board layout • Power Transformer: Same design and insulation system • Same enclosure except for decorative parts • Same high voltage layout • Same IP rating

Guidelines for Quantitative Selection of Samples

- A series may consist of 10 models.
- Unless specified otherwise, one sample may be tested for each series.
- In any of the above consideration, worst case configuration from Safety Design perspective must be selected for testing.
